

Jansson

Jansson is a C library for encoding, decoding and manipulating JSON data. It features:

- Simple and intuitive API and data model
- Comprehensive documentation
- No dependencies on other libraries
- Full Unicode support (UTF-8)
- Extensive test suite

Jansson is licensed under the [MIT license](#).

Jansson's mailing list is [jansson-users](#) at Google Groups. You're welcome to ask for help, send suggestions, submit patches, etc.
